Fund Objective

The investment objective of the Tiroche DeLeon Collection (the "Fund") is to generate growth through investment in contemporary art from developing markets. By investing in the Fund experienced investors may diversify into an uncorrelated asset class with proxy exposure to emerging market growth. The Fund is suitable for experienced investors who can tolerate illiquidity and a degree of volatility. Akin to a private collection, the Fund invests in the long-term prospects of leading contemporary artists from new markets, anticipating increased demand for these artworks over the medium to long term. The objective is to generate net investor returns over the 10 year life of the Fund in excess of 10% per annum. This is achieved by combining long-term market exposure with an active management strategy. [Read More](#)

Quarterly Commentary

In the second quarter of 2013, the contemporary art market continued to move from strength to strength. Perhaps the most significant manifestation of this was the new US\$ 495 million all time record for a single auction, set by the Christie's Contemporary evening sale on May 15 in New York. Again, numerous artist records were broken. May also featured the first edition of Art Basel Hong Kong, which by all accounts was a huge commercial success, re-affirming the rise of Hong Kong, and more broadly speaking China, as the major growth area of the contemporary art market. Christie's announced their license for mainland expansion into China with a first auction scheduled for September in Shanghai. Sotheby's have also entered into a joint-venture in China to conduct auctions in the mainland. [Read More](#)
