Fund Objective

The investment objective of the Tiroche DeLeon Collection (the "Fund") is to generate growth through investment in contemporary art from developing markets. By investing in the Fund experienced investors may diversify into an uncorrelated asset class with proxy exposure to emerging market growth. The Fund is suitable for experienced investors who can tolerate illiquidity and a degree of volatility. Akin to a private collection, the Fund invests in the long-term prospects of leading contemporary artists from new markets, anticipating increased demand for these artworks over the medium to long term. The objective is to generate net investor returns over the 10 year life of the Fund in excess of 10% per annum. This is achieved by combining long-term market exposure with an active management strategy. [Read More](#)

Quarterly Commentary

The art market continues to power ahead, buoyed by the Post War and Contemporary sectors with more record sales at the top end of the US market. Reports recently, conclude that the art market increased 7% in 2014 to a new peak of 51 Billion euros, of which \$15.2 Billion was attributable to the auction business. In terms of breakdown, the US led with a 39% share of the overall market whereas China retained top share of the auction market at 37.2%.

On the fund side we have completed preparations for our new artist residency program which launches in April, have made numerous acquisitions, particularly in Asia, and concluded one sale that set a new auction record. Our loan program continued to expand to new venues, particularly in Asia where new spaces and a growing appetite for international art and culture reconfirm our long term strategy. [Read more](#)
